

Dear estimated customers

We have appreciated very much, that you have stayed with us during the festive season.

Maybe you have joined us for one of the concerts, a show, the Christmas celebration in the forest or some other activity? We always try to offer something for all ages and every interest during our festive program. Any comments or inputs concerning this topic are a great help for our organization.

If you have enjoyed your stay, we would be more than pleased to count you among our regular guests again next year. For that purpose we offer the following service:

We reserve the room(s) of your choice temporarily for you corresponding to this years' reservation or according to your wishes. You will subsequently receive a Waldhotel mail in the month of September, reminding you about your reservation and asking you to make your booking definite until October. Did your plans change in the meantime? No problem: just tell us or ignore our mail. Your pre-reservation will in that case be cancelled without any financial consequences. A definite booking only applies upon your confirmation.

Your advantages:

- The room of your choice will be blocked for you until the beginning of October.
- Our reminder makes sure, that your reservation will be confirmed in time.
- A definite booking only applies upon your confirmation.

This service makes our own plannings and organization much easier too as otherwise we can not guarantee that all our regular guests will receive their favorite room(s) during this special time of the year.

Please return this part or the whole form upon departure at front desk:

Family/first name: _____

Adress: _____

Mail: _____ Phone: _____

I am interested in the pre-reservation service.

- Please do a provisional reservation for me corresponding to this years' booking.
- Please do a provisional reservation for me as follows:

_____ number of rooms _____ number of persons period _____

- only BB
- with dinner

Please note: _____

- I would already like to make a definite booking as stated above.
